

Product Data Sheet

Neutrik BST BNC Cable Boots

Description

Designed for industrial applications, these high-quality coloured boots for rearTWIST BNC cable connectors are made to be used with Rear Twist BNC 75ohm Connectors. Suitable for 3Gb/s HD-SDI 1080p, SD-SDI and analogue video, they offer excellent mechanical and electrical performance, with precision-machined components that give true 75ohm impedance and excellent return-loss, even at frequencies up to 4.5GHz.

As a compact variation of the traditional connector, mating and un-mating is accomplished by twisting the whole connector, rather than just an awkward knurled front coupling nut. Where restricted access to the 'head' of a conventional connector may be problematic, these boots provide an extended grip area, making them ideal for recessed connection panels or HD termination panels. BST-BNC boots should be used with NBNC-type connectors.

Colour-coding legend:

0 - Black 1 - Brown 2 - Red 3 - Orange 4 - Yellow 5 - Green 6 - Blue 7 - Violet 8 - Grey 9 - White

Caution: Use the correct size connector, and corresponding crimp dies for each cable.

Required accessories: Neutrik crimp tool and die-set.
